The student were recognized as computer science student of year because I was created Arduino robot

## SKILLS

- A highly skilled Full Stack Developer with expertise in both **front-end and back-end technologies**, capable of designing, developing, testing, and deploying complete web applications. Proficient in **HTML, CSS, JavaScript**, and modern frameworks such as **React, Angular, or Vue.js** for building responsive and interactive user interfaces. Strong experience with **server-side development** using **Node.js, Express, Django, or Laravel**, and database management with **MySQL, PostgreSQL, MongoDB, and Firebase**. Skilled in **RESTful APIs, authentication, authorization, and third-party integrations**. Knowledgeable in **version control (Git/GitHub), cloud platforms (AWS, Azure, Vercel), CI/CD pipelines, and DevOps basics**. Focused on **performance optimization, security best practices, clean code, scalability, and cross-browser compatibility**, with strong problem-solving, teamwork, and communication skills

## ACTIVITIES

Actively involved in the **end-to-end development** of web applications, including requirement analysis, UI/UX implementation, back-end logic development, and database design. Regularly **build, test, debug, and deploy** full stack applications while ensuring performance, security, and scalability. Collaborate with designers, product managers, and team members to deliver high-quality solutions. Participate in **code reviews**, maintain version control using Git, and follow **agile development practices**. Continuously research and implement **new technologies, frameworks, and tools** to improve application efficiency. Handle **API integrations**, manage cloud deployments, and monitor application performance. Actively contribute to problem-solving, optimization, and maintenance of existing systems..
